

An Introduction to the Management of Syringe Drivers

This half day session provides an opportunity for registered general nurses and doctors to consider the appropriate use of a syringe driver (McKinley) in palliative care.

There will be a focus on the implications for its use, advantages and possible disadvantages, drug compatibility and the practicalities of setting the syringe driver up as well as monitoring the effect of its use.

A certificate of attendance, not competence, will be issued.

Time: 1.30pm – 4.30pm

Dates:

Monday 30 September 2019

Thursday 12 December 2019

Tuesday 11 February 2020

Thursday 19 May 2020

Who should attend: registered general nurses and doctors

Please note: An Introduction to the Management of Syringe Drivers and Symptom Management in the Last Days of Life courses are on the same day as they complement each other. Why not sign up for both and make a day of it? (Light lunch included)

Cost: £40 including refreshments and handouts.
Please contact us if you are interested, we may have an agreement with your employer for payment.
